	Examiner Temica M. Beamer	Art Unit 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 7 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Nolan et al (Nolan), U.S. Patent No. 7,013,257.

Regarding claims 1 and 11, Nolan discloses simulation system comprising: an event handler that is configured to determine occurrences of events ((col. 7, lines 37-47), a node simulator that is configured to simulate each event to determine one or more characteristics associated with the occurrence of the event (col. 7, lines 25-39), a cache that is configured to store the one or more characteristics associated with the occurrence of select events (col. 8, lines 29-40), and a cache controller that is configured to determine whether: to invoke the node simulator to determine the one or more characteristics associated with a subsequent event or **to retrieve the one or**

more characteristics associated with the subsequent event from the cache (col. 8, lines 30-39).

Regarding claim 2, Nolan discloses the simulation system of claim 1, wherein the select events correspond to communications from a transmitter to a receiver in a wireless network (col. 4, lines 4-26, col. 7, lines 7-25).

Regarding claim 7, Nolan discloses the simulation system of claim 1, wherein: each event includes factors that influence the determination of the one or more characteristics, and the cache is configured to store the one or more characteristics based on the factors (col. 8, lines 30-43).

Allowable Subject Matter

4. Claims 3-6, 8-10 and 12-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 4-6, 9, 10, 13, 14 and 16-19, they indicated allowable based on their dependence from allowed claims 3, 8 and 11.

5. Claims 20-27 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: Prior art fails to suggest or render obvious a cache for retrieving event based information as described.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Harvey et al, U.S. Patent No. 6,052,584, discloses CDMA cellular system testing analysis and optimizations.

Rahman et al, U.S. Patent No. 6,571,082, discloses a wireless field test simulator.
